---

You just have to stop. The injections of toxins will be there forever.  
What Dane society poisons its fresh water?  
None! Wake up before we're poisoned by the chemicals, their residue, the particles we breath and the land we grow  
our food in where it all ends up.  
Fracking is as insane as blowing up mountain tops for coal or ore.  
We are scaring the earth and killing ourselves because of greed.  
Don't cut your nose despite your face.
